

Initial build notes

Developer: Jeeho Kang

Creative Director: Carl Wang

I really like the home page and the gradient background. However, for the bottom bit of the home page the three images seem to have backgrounds of their own. I wonder if you could do a background removal for these or find replacements with transparent backgrounds.

	The Civic is manufactured by Honda, a Japanese company known for innovation and reliability. Honda first became a major automaker in the 1960s with compact cars like the N360 and later the Honda 1300, leading to the Civic's debut in 1972.
	The Civic has been rebadged and produced internationally, with regional versions like the Acura EL (Canada), Rover 200 (UK), and Isuzu Gemini (Japan). It's sold worldwide, and has consistently been the most popular passenger car in Canada.
	The Civic is available globally in a range of trims and models, typically priced between \$23,000 - \$32,000 USD (2024 model year range based on Honda's official site).

I think the generations page is also really good, and reflects the idea and visual style of the mockup and the civic's style. One small thing I think is it seems like all the images seem to get either the head or the tail bit cut off. I wonder if you could modify the image sizing so images fill fully in their boxes?

	<h3>Seventh generation (2000)</h3> <p>Released for the 2001 model year, it introduced MacPherson struts and the K-series engine, improving cabin space with a flat rear floor. The first Civic Hybrid appeared this generation.</p>
---	---

For the safety page, it is really good, I like how you used the wikipedia table, it is quite clear. I also like how you structured the rest of the information. One thing I noticed is that for all pages the padding/margin at the bottom of the page seems to be a bit different.

For the racing heritage page, I think the information is structured well and the images are well used. I believe there's nothing to be done here to improve it.

For the sales page I wonder if you could make the table align with the text like the Sales page? Also this page doesn't seem to have a bottom padding/margin as other pages.

Sales

As of February 2015, **18.5 million** Civics had been sold worldwide. With **7.3 million** bought in the United States, it has been one of the top sellers in the country and in Canada, where it placed number one for 14 years through 2012. In **2019**, the Civic was the **second-best-selling car in the U.S.** after the Toyota Camry.

Year	Sales	±%	Year	Sales	±%	Year	Sales	±%
1973	32,575	—	1991	232,690	−11.0%	2009	259,722	−23.5%
1974	43,119	+32.4%	1992	219,228	−5.8%	2010	260,218	+0.2%
1975	102,389	+137.5%	1993	255,579	+16.6%	2011	221,235	−15.0%

Overall I think this build is really good and not much needs to be changed. I like the styling and structure, and the content. One final thing I'd say is if another font could be used instead of the current font.
